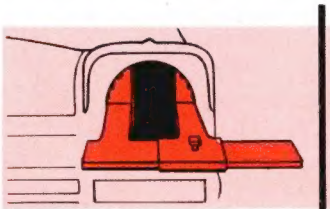
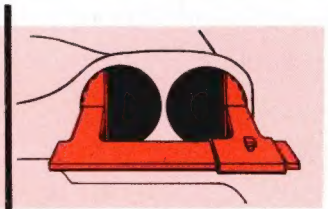
New — Blackhawk Headlight Puller Fits Both Single and Duals!

Another new product for your Pull-Dozer . . .
Speeds front end repairs faster than ever before!



For single headlight openings, loosen nut and slide Model EK-227 Headlight Puller to proper position. Insert and hook up to Pull-Dozer and you're ready to make faster repairs, cut job time.



It's as easy for duals too! Just widen Headlight Puller to accommodate the dual slot. Dents and wrinkles disappear in minutes . . . no complicated set-ups!

Here's another new, exclusive Blackhawk tool . . . easy to use with Pull-Dozer for *really fast* front end repairs. Model EK-227 Headlight Puller is easily adjustable for either round single openings or the new long slots for duals . . . the only headlight puller on the market that does this! And only Blackhawk Headlight Puller has holes drilled in the pads to use with those cars which do not have headlight openings. Made of rugged steel to last for years of profitable service. You'll more than pay for this low-cost profit-making attachment on the very first job!
